Statistics

Publications Statistics Researchers Statistics Institutions Statistics

654.397 publications from 4 sources 1.903 since last week

87.735 researchers and 38.209 researchers with ≥ 1 publication.

1.436 researcher's authorizations 78.931 publications synchronized.

424.823 author - researcher validations

2.163 portuguese institutions

6.658 active users

The screenshot shows the homepage of the authenticus platform. At the top, there are links for Publications, Researchers, and Institutions, along with a sign-in button and a language selector. Below this, a large section titled "Statistics" displays various metrics. It includes four main cards: one for publications (654.397 total, 1.903 since last week), one for researchers (87.735 total, 38.209 with at least one publication), one for ORCID (1.436 authorizations, 78.931 publications synchronized), and one for institutions (2.163 Portuguese institutions). Each card features a corresponding icon (bar chart, graduation cap, ORCID logo, and building) and a link to more detailed statistics.

Sign in

The screenshot illustrates the sign-in process on the authenticus platform, which integrates with the University of Porto's authentication infrastructure.

1 AUTHENTICATE: The user is prompted to authenticate using either **Federated Authentication** or a **Local User Account**. A callout box shows the "FCCN Federated Authentication" interface, which includes links for "Local Sign In", "Password Recovery", and "Register".

2 EXPLORE: After authentication, the user gains access to the platform's features, such as updating their researcher profile, checking statistics, and exploring bibliometric rankings.

Federated Authentication Interface (Callout Box):

- A single key for all services
- Select your home institution: Select the institution you are affiliated with... (dropdown menu)
- Login button
- Remember your institution for this session checkbox
- Remember your institution permanently and bypass this step from now on checkbox
- Help RCTSaaI link
- FCT logo: Fundação para a Ciência e a Tecnologia
- FCCN logo: Fundação para a Comunicação Científica Nacional

AAI - Authentication and Authorization Infrastructure interface:

- Login with Username and Password form (Username and Password fields, Login button, "Forgot your password?" and "Need Help?" links)
- Login with Digital Mobile Key or Citizen Card form (Digital Mobile Key / Citizen Card button, "Know more about Digital Mobile Key." link)
- Checkboxes at the bottom: "Don't remember login." and "Clear prior granting of permission for release of your information to this service."
- © 2018 University of Porto
- COMPETE 2020, Portugal 2020, and ERDF logos

| Abstract | We present heuristics for two related two-dimensional non-guillotine packing problems. The first problem aims to pack a set of items into the minimum number of larger identical bins, while the second aims to pack the items that generates most value into one bin. Our approach successively creates sequences of items that defines a packing order considering knowledge obtained from sequences previously generated. Computational experiments demonstrated that the proposed heuristics are very effective in terms of solution quality with small computing times. © 2021, Springer Nature Switzerland AG. | |

Publications

The screenshot illustrates the process of moving a document from a personal area to a publication process:

- Left Panel (Documents in your personal area):** Shows a list of documents. One document, "example_document (pdf)", is selected (indicated by a checked checkbox). Other buttons include "Upload document" and "Delete selected".

Files: 1; Size: 0KB
- Middle Panel (Documents associated with the process):** Shows a list of documents. The same "example_document (pdf)" is listed here, also with a checked checkbox.

Files: 0; Size: 0KB
- Central Panel (Publications):** Shows a list of documents. The "example_document (pdf)" is listed here, now with an unchecked checkbox, indicating it has been moved.

Files: 1; Size: 0KB

Buttons between the panels include "Delete selected" (top), ">>>" (between personal area and associated process), and "<<" (between associated process and publications).

Open Repository U. Porto

<https://repositorio-aberto.up.pt/>

Welcome to the Open Repository of the University of Porto!

The Open Repository collects, preserves and publishes the intellectual and scientific production of the academic community of U.Porto. It ensures an open and free access to the full text version of documents whenever it is authorized by the authors.

The repository is organized in Communities and Collections: the first correspond to organic entities of U.Porto (and also Porto Business School, I3S, CIMA, ISPUP) and the latter comprise the outputs of each community organized by types

of documents – articles, books, chapters of books, master and doctoral thesis, posters, reports and others.

Publications are all covered by [Creative Commons](#) public license and it is strictly forbidden any use that is not authorized by it.

For further information please visit the [FAQ](#) or send an email to documentacao.informacao@porto.pt.

Synchronization from SIGARRA (Thesis and Publications Modules):

- 24/48h - usually the next day;
- Migration of the publications that have an associated file, regardless of the type of access.

Types of file access:

- Open Access
- Access with embargo period
 - In confidentiality situations for a certain period of time;
 - To comply with scientific journal policies.
- Restricted Access
 - To comply with scientific journal policies;
 - Possibility to request a copy from the author(s).

| Author(s): | Bruno Miguel Oliveira Pombal |
| Title: | Análise da integração dos objectos digitais do repositório da FEUP no repositório da UP |
| Issue Date: | 2008 |
| Description: | Começa-se este documento com uma definição de repositório digital. Apresenta-se de uma forma abreviada o repositório da FEUP (Faculdade de Engenharia da Universidade do Porto), o repositório da UP (Universidade do Porto) e o projeto que visa a constituição de uma estrutura organizacional e tecnológica, para implementar uma camada de dados pan-europeia, que permita o uso avançado de recursos de conteúdos na área da investigação no ensino superior - DRIVER. Em seguida, faz-se uma análise crítica e construtiva, ao processo de importação dos metadados do repositório da FEUP para o repositório da UP. Esta análise culminou na identificação de necessidades de afinação e melhoramento nos metadados (do lado do repositório da FEUP) e nos procedimentos e metadados (do lado do repositório da UP). Foi ainda criada uma tabela de mapeamento do conteúdo do campo <dc:type> dos metadados do repositório da FEUP, nos metadados do repositório da UP e no DRIVER. São também apresentados diversos links que permitem concretizar de forma mais optimizada, a importação de metadados do repositório da FEUP para o da UP. Por último, são tecidas breves considerações acerca das colecções de acesso condicionado no repositório da UP e sobre o módulo de publicações do SIGARRA, referindo a forma deste, poder ajudar a aumentar a qualidade e a quantidade de informação disponibilizada no repositório da UP. |

About RCAAP

RCAAP portal aims to collect, aggregate and index Open Access scientific contents from Portuguese institutional repositories.

RCAAP constitutes a single entry point for searching, discovery and recall of thousands of scientific and scholarly publications, namely journal articles, conference papers, thesis and dissertations, distributed by several Portuguese repositories. A list of the repositories aggregated in the portal is available in the [Directory](#).

RCAAP portal is one of the main components from the project [Repositórios Científicos de Acesso Aberto de Portugal](#). RCAAP project is an initiative from [UMIC Knowledge Society Agency](#), developed by [FCCN Fundação para a Computação Científica Nacional](#), with the technical and scientific collaboration from [Minho University](#).

The current version of RCAAP portal was developed based on the platform from the network [La Referência](#).

Gestão da eficiência em Serviços de Documentação e Informação

... Bruno Pombal; Tom Wilson; Ana Azevedo

This work was developed under the Informatics Engineering Master programme and is the written dissertation to obtain the respective degree. In the origin and motivation of this work was a hiatus in knowledge, which consisted in knowing whether it could be used efficiency indicators as a tool for monitorization and management of processes inherent to Library and Information Services, in a context of processes opt...

Author(s): [Bruno Pombal](#) ; [Tom Wilson](#) ; [Ana Azevedo](#)

Date: 2010

Origin: Repositório Aberto da Universidade do Porto

Subject(s): Ciência da Informação, Processamento de informação, Gestão de Informação, Economia e gestão; Information science, Information processing, Information management, Economics and Business; Ciências sociais::Economia e gestão; Social sciences::Economics and Business; Ciências sociais::Economia e gestão; Ciências sociais::Economia e gestão; Social sciences::Economics and Business; Social sciences::Economics and Business

Description

Este texto é baseado na dissertação de mestrado do primeiro autor, com a qual partilha o título e grande parte do seu conteúdo. Com este texto pretende-se mostrar que é possível usar indicadores de eficiência como instrumento para monitorizar e gerir processos inerentes aos Serviços de Documentação e Informação, num contexto de optimização de processos e de prestação de contas aos stakeholders. São desenvolvidos quatro indicadores de eficiência de processos (custo e tempo), são identificados problemas inerentes ao processo de cálculo de indicadores e são propostas formas para o agilizar.
